2023 Advocacy Fellows Reflection

Before becoming an advocacy fellow for Breakthrough Central Texas, I knew little to nothing about how bills get passed and ways that they affect the community. I was not involved in these conversations as I would get anxious when hearing about the bills. But this wonderful opportunity allowed me to learn more about the bills and about ways to speak out against them. Learning about the ways that we can take action gives me hope and helps with the anxiety I had. This was an amazing experience that allowed me to work with great people, learn more about bills and advocate for others. I would definitely recommend everyone to join!
